

# Set of 2 Solar Chinese Hanging Lanterns

## User Guide

Thank you for choosing The Solar Centre's Set of 2 Solar Chinese Hanging Lanterns. Please read these instructions carefully before using your lanterns.

**Always take care when setting up your Solar Chinese Hanging Lanterns especially when you are situating them in high places.**

### Installing your Solar Chinese Hanging Lanterns

Take one of your Solar Chinese Hanging Lanterns and place it top down on a flat surface (solar panel facing down). At this stage the lantern should be completely flat and the underside of the solar panel pack exposed through the hole in the bottom of the lantern. Locate the u shaped wire support piece and place the 2 prongs into the two holes on the underside of the solar panel. While holding onto the u shaped wire support piece gently raise the nylon lantern material up and over the top of the wire support with your free hand so that the lantern is fully shaped. You are now ready to hang your lantern.

Before hanging your lantern think carefully about how much sun will be able to reach the solar panel in your intended location. Hanging your lantern under an eave or under a dense tree canopy for example will limit the amount of charge your lantern will receive each day.

### Using your Solar Chinese Hanging Lanterns

Now you have assembled and positioned your lanterns you need to charge them up prior to use. Locate the on / off switch which is situated on the underside of the solar panel pack. Ensure that the switch is turned off and leave the lanterns for 3 days to build up a base charge. On the evening of the 3rd day turn the lanterns on and wait until dark.

Please repeat this charging process if your lanterns run low on charge at any time or don't appear to be staying on after dark for as long as expected.

### Safety Instructions:

The Solar Centre assume no liability for any damage resulting from the use of this product, nor do we assume liability for any damage to property or personal injury caused by improper use or failure to observe the safety instructions.

Unauthorised conversion and/or modification of the unit will result in the invalidation of any guarantee

This device is not a toy and should be kept out of reach of children

Do not expose the device to extreme temperatures (less than -25°C or higher than 50°C) or strong vibration or mechanical stress

Do not leave the packaging material unattended after installation

### Maintenance:

Clean the surface of the solar panels on your Solar Chinese Hanging Lanterns with a soft, slightly moistened cloth or a dry brush only. Do not use corrosive cleansing agents or chemical solutions since this may damage the housing surface or impair operation. Keep the solar panels on your Solar Chinese Hanging Lanterns free of dirt, debris and snow, or the battery in your Solar Chinese Hanging Lanterns will not charge properly. This may also shorten battery life or cause malfunction.
