

ATMOS

SOLAR SPOTLIGHT

USER GUIDE

Ensure your solar panel is South facing or as near as possible

Clean your solar panel from time to time

Do NOT place your solar panel in shaded areas.

Do NOT charge behind glass

Thank you for choosing the Atmos Solar Spotlight. Please read these instructions carefully before using your light.

Important notes

Always take care when installing your light. If you are at all unsure, please contact your retailer or a professional trades person for advice.

Installation

Remove all packaging and put to one side. Please carefully consider where you wish to install your light before making alterations to your property. It's particularly important that the solar panel receives as much sunlight as possible. Ensure that it is not obstructed by buildings, fences, trees, sheds, etc, or the shadows that these create. **If the solar panel is installed in a poor location, it may not perform to the best of its ability.**

To maximise the battery capacity, the lights should be charged in direct sunlight for at least 12-24 hours before being used for the first time

The lights will turn ON/OFF automatically when left in the on position. Please note it is completely normal for the lights to come on at different times as it depends on how fast they charge in their location. **Please note your light will not turn on if it is daylight, to test your light is working take it into a dark room or use a cloth to cover the solar panel.**

Features

1. Adjustable solar panel
2. Adjustable knob
3. Swivel arm
4. Mounting plate
5. 8 LED High quality lights
6. Motion sensor
7. Sensor mode/off switch
8. Ground spike
9. Stake

Wall Mounting Spotlight

1. Remove the mounting plate from the spotlight by twisting the dial counter-clockwise

2. Choose a location with maximum sun exposure. Drill holes matching the pattern on the mounting plate as a guide, and install the plastic dowels provided. Attach the mounting plate using the 3 screws provided.

3. Align the arm of the spotlight with the opening on the mounting plate. Twist the dial clockwise to tighten and secure it.

In-Ground Installation

1. Make sure that the mounting plate is attached to the swivel arm of the unit.

1. Insert ground spike into the stake.

2. Ensure the soil is softened. Insert the stake into the ground.

3. Place the spotlight onto the stake mount.

Adjusting angles: To adjust the angle of the solar panel, loosen the adjustment knob and once the desired angle has been selected, tighten the knob. You can also swivel the arm of the spotlight to direct the light where needed.

Troubleshooting

Please ensure that there are no nearby light sources shining on the solar panel after dark. These could be bright indoor/outdoor lights from your property or neighbours, or streetlights.

If you are unsure, take the light inside and test it in a dark room.

If you are encountering any problems with your Atmos Spotlight often you can resolve this yourself by following our troubleshooting guide. If the light has its solar panel in a poor location it will struggle to work, but that doesn't mean there is a fault with the unit. Please remember that the light will arrive with some charge and will likely work for a few days even if the solar panel is poorly located. Please try the troubleshooting tips below before contacting your retailer.

Recharge Procedure

1. Double check the location of your solar panel to ensure it is in a clear location and as South facing as possible.
2. Turn the light off at the switch and leave it to recharge for 3-5 days ensuring one sunny day has passed.
3. After 3-5 days return to the light and turn it back on at the switch.
4. If your light still does not illuminate after dark, please contact your retailer.

Maintenance

Clean the surface of the solar panel and light lens with a soft, slightly moistened cloth. Do not use corrosive cleansing agents or chemical solutions as these may damage surfaces and impair operation. Keep the solar panel free of dirt, debris and snow.

Safety Instructions

The Solar Centre assumes no liability for any damage resulting from the use of this product, nor do we assume liability for any damage to property or personal injury caused by improper use or failure to observe these instructions.

Unauthorised conversion and/or modification of the unit may be dangerous and will invalidate your warranty. To avoid damage to sight, do not look directly at the light source. This device is not a toy and should be kept out of reach of children. Do not submerge the device in water or expose it to extreme temperatures (less than -25°C or higher than 50°C).
